McCarran International Airport, Las Vegas Nevada USA

Mounts, Carts & Stands for Digital Signage

PREMIER MOUNTS®
CREATING POSITIVE CUSTOMER EXPERIENCES

Mounts, the "Backbone" of Digital Signage

Premier Mounts has developed a wide selection of innovative products to support digital signage displays. Mounts, carts and stands provide the crucial "backbone" for all A/V installations ranging from large video walls to point-of-sale displays, trade show signage and school campus information systems.

Too often, the importance of mounts is underestimated in the design and implementation of digital signage and A/V projects. The fact is, equipment mounting is one of the most unpredictable variables of A/V systems integration.

With over 35 years of experience designing and manufacturing mounts, Premier Mounts has worked closely with display manufacturers, systems integrators and installers to provide mounting products and "know-how" for many challenging digital signage projects.

10 x10 screen digital signage wall at
McCarran International Airport in Las Vegas

Recent projects include one of the largest public A/V installations in the U.S., the McCarran International Airport 10x10-screen HD video wall in Las Vegas. Each video wall frame has a scissor mount with fine-tune leveling adjustments, making it substantially easier for the installer to set up and service displays within this giant video wall matrix.

Other applications include modular video wall frames that can be arranged into a variety of mobile video walls for all major brands of thin-bezel displays. Previous digital signage projects include the Public Library of Cincinnati and Hamilton County in Ohio, the Planet Hollywood Professional Bull Riders (PBR) Rock Bar on the Las Vegas Strip, and the Dallas Fort Worth International Airport.

LMV mounts supplied by Premier Mounts

PREMIER MOUNTS®

Mounts for Digital Signage

Large Matrix Video Wall Mounts

LMV
Pull-out scissor mount

MVW46
Rigid modular interlocking
frame mounts

FEATURES

Premier Mounts mobile or permanent video walls are designed to fit many applications. The fundamental key to their design is modularity, ease of installation and serviceability.

- LMV: This large matrix video wall mount features multi-monitor stacking, spring-loaded release, open design, custom spacers, top-adjustable mounting brackets and straight scissor-style extension.
- MVW46: Modular video wall frames provide fast setup and tear down on dual pole carts and stands making them perfect for mobile needs.
- P-Series: This series of low-profile flat-panel mounts are perfect for permanent small scale security monitoring stations.

Video wall displays are also popular for command centers or security applications where several surveillance views need to be monitored simultaneously.

PREMIER MOUNTS®

1 to 100 Displays and More …

The Ultimate Digital Signage Display

A video wall was installed at Imaging Advantage in Phoenix, Arizona using Premier Mounts' LMV mounts. The 4x4 matrix was installed in the reception area for an eye-catching digital signage application. Using 46" NEC displays, Premier Mounts worked closely with the display manufacturer, A/V systems integrator and the architect to complete this project successfully.

Mobile Digital Signage Video Wall

A modular video wall frame that can be arranged in a variety of different mobile video walls. They are currently available off-the-shelf for Samsung® and NEC thin-bezel displays. Other model-specific frames are available for Panasonic® and Orion®. The MVW46 is typically used at trade shows for digital signage. NEC used MVW46s above their DSE 2010 and InfoComm® 2010 trade show booths instead of traditional company signage.
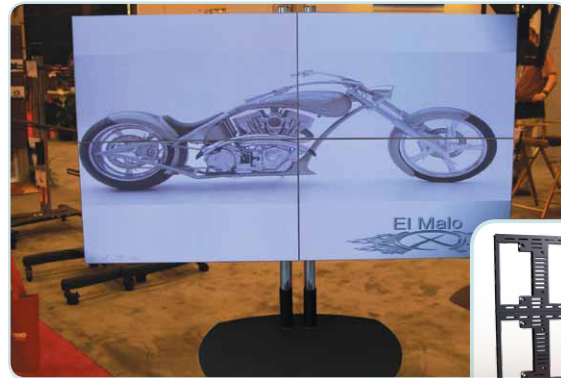

Small Linear Video Wall for Electronic Menu Boards

Combine P-Series mounts into a linear video wall or menu board by connecting them side-by-side. These low-profile flat-panel mounts are easy to install and come with lateral-shift alignment and fine-tune leveling adjustment. They're ideal for retail stores, fast food restaurants, airports and public venues.

Video Walls for Digital Signage
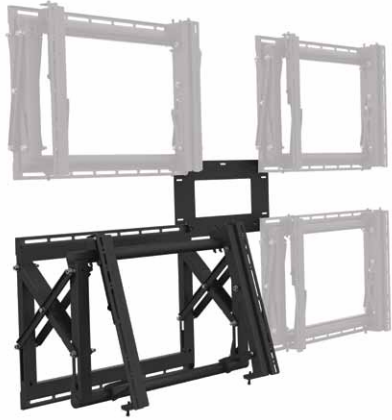

LMV SERIES
Large Matrix Video Wall Mount

- A large matrix video wall mount for permanent installations
- The pull-out scissor base frames are designed for large displays
- Top-adjustable display mounting brackets align display in x, y and z plane
- Model-specific spacers to fit most large video wall displays

See www.mounts.com for full list of features.

LMVF
Flat Video Wall Mounting Frame

- Mount multiple flat-panels above, below and to the side of one another
- Model-specific spacers to fit most large video wall displays
- Top-adjustable mounting brackets have 3 labeled adjustment points on each arm to provide 6 points of adjustment

See www.mounts.com for full list of features.
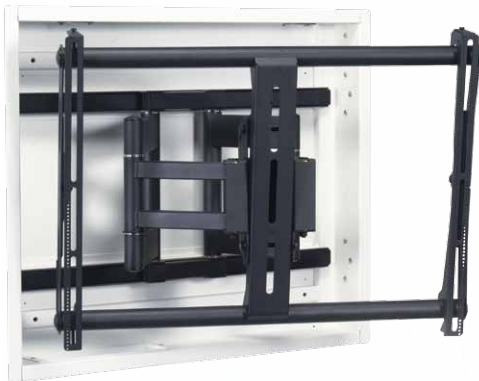

AM175
Swingout Mount for Flat-Panels up to 63"

- Scissor-style mount extends 3.2 in.-15.9 in. from the wall
- Lightweight tubular design makes installation easy and includes adapters that reach extra-wide mounting patterns
- Features patented Griplate™ System
- Combine with the INW-AM325 In-Wall Box for a "zero profile" installation

See www.mounts.com for full list of features.

PREMIER MOUNTS®

A Mount for Every Video Wall

MVW55

MVW46

MVW46/55
Modular Video Wall Frame for 46"/55" Flat-Panels

- Layout options in portrait or landscape orientation
- Mounts attach together for mobile installations
- Mount on dual-pole cart or stand, or fly from the ceiling
- MVW46 Available for NEC and Samsung 46" thin-bezel displays
- MVW55 Available for NEC and Samsung 55" thin-bezel displays

See www.mounts.com for full list of features.

P-SERIES
Linear Video Walls

- Ideal for small linear video walls where the displays are arrayed horizontally
- Post-installation leveling system
- Open design for easy cable and electrical access

See www.mounts.com for full list of features.

RFM
Creative Video Walls

- The RFM is a flat-panel mount with continuous 360° rotation. Various mounting options for wall, ceiling, cart or stand installation.

See www.mounts.com for full list of features.

MicroTiles® Mounts

MTM-3000

MTM-6060

FEATURES

The Christie® MicroTiles® Mounting System, intended to be the industry's quickest installation of MicroTiles®, allows any configuration to be installed quickly and easily on any surface.

- Tiles can be stored in cases attached to the mount for off-site setups
- Hooks allow mounts to be placed quickly in the desired position with no need for fine-tune adjustments
- Various sized wall brackets are available to configure the array to the desired size
- Floating wall brackets create flat and plumb surface to align tiles properly

Video wall displays are also popular for command centers or security applications where several surveillance views need to be monitored simultaneously.

PREMIER MOUNTS®

Allows any cofiguration to be installed quickly ...

Public Information Display

Christie® MicroTiles® Mounting System

The Christie® MicroTiles® Mounting System provides a virtually seamless and perfectly aligned video wall display. With precision design, the mounting system provides the necessary features to provide a quick and easy setup with no need for fine-tune adjustments. The system is also flexible and can be customized to any size.

A mounting system designed specifically for Christie® MicroTiles® alllows users to take full advantage of the tiles' modular and flexibile design and assure a virtually seamless video wall display with unmatched attention to detail and full accessibility. It also provides support for one of the most visually dynamic displays available in the industry for any setting including retail, advertising, or corporate offices.

Security and Emergency Operation Centers

The precision design of the Christie® MicroTiles® mounting system ensures seamless alignment with full accessibility. A great option for security command centers, the MicroTiles® provide a crystal clear image for surveillance monitoring with multiple views, while the mounting system provides flexibility with permanent or mobile installations available, as well as full access for display serviceability.

Floor Stands

MVWS-2X2-4655

PSD-TL
with accessories

FEATURES

- Pick a pre-configured cart or stand for common uses
- Mix and match individual parts for special projects
- Lightweight or heavy duty base
- Route cables through the pole(s)
- Mount adapter included to attach display
  mount to poles
- Chrome or black powder-coated poles
- Many post-installation accessories available

User-friendly and versatile, Premier Mounts' floor stands can be individually mixed and matched to meet any specific project requirements. Flexibility and adaptability are also built into the products as they are mobile and can be placed in any location, such as the ability to fly the video wall stands from the ceiling. Whether it be mounting one flat-panel to a floor stand or creating a mobile video wall, Premier Mounts has an option to fit any need.

PREMIER MOUNTS®

For Digital Signage

Education

Floor stands are a versatile option for any setting, providing flexible digital signage displays for any environment from library to trade show floors. Quick and easy setup with option to mix and match a customized stand to fit specific project needs, or choose from a pre-configured selection for a no hassle setup.

Trade shows

Designed for trade shows and events where breaking down, shipping, handling, and moving can become tricky, this system simplifies it all. Floor stands are versatile with a quick and easy setup, allowing for seamless video wall configurations in any setting or event, such as trade shows. Grow the array horizontally to the desired size or suspend from the ceiling for a customized digital signage display.

Corporate

The modular two-by-two mounting system's versatility and adaptability is the key save cost. Quick and easy setup with a seamless finish, the floor stands are a great option for any setting where digital signage is needed, including reception areas and lobbies. With its versatility, a video wall display is available anywhere from a static stand to a ceiling suspended configuration.

Video Wall Stands

MVWS-2X2-4655

- Includes unique adjustment bolts for assuring cart remains level
- This system accepts additional display sections horizontally to increase array size
- Rapid setup using 1\2-13 bolts
- Quickly and easily remove feet when displays are to be flown from above. (Use MVWS-2X2-4655-HDR header; sold separately)
- Patent pending, top-adjustable display mounting brackets ensure displays are aligned and level
- Completely breaks down for easier shipping, handling, and moving

See www.mounts.com for full list of features.

PREMIER MOUNTS®

Floor Stands

- Multiple units can be mounted side-by-side and/or in rows to create a video wall
- Can be mounted to any Premier Mounts' dual-pole cart or stand or suspended
- Individual mounting panels assemble to create a video wall
- Includes mounting hardware pack
- Layout options in portrait or landscape orientation

See www.mounts.com for full list of features.

CS Base with 2x2 MVW46

- Lightweight, reinforced design
- Cable management inside poles
- UFA flat mount features dual two-inch openings, universal mounting hardware and security screws to hold arms fixed in place
- Base features ergonomic transport handles
- Adjustable flat-panel placement along poles for perfect viewing height

See www.mounts.com for full list of features.

TL72-UFA-XL

Floor Stands

PSD-TL
Dual-Pole Lightweight, Reinforced Floor Stand

- Lightweight, reinforced design
- Ergonomic transport handles
- Cable management inside poles
- Available in 60 in., 72 in. and 84 in. heights
- Works with CTM, RTM-S, RTM-L, UFA
  or USA mounts (not included)
- Complete stand includes one
  single display adapter (PSD-SPA)

See www.mounts.com for full list of features.

PSD-HDCA
with PSD-MBX200 & DCSHLF-EQ

- Allows air flow and keeps A/V equipment and IT
  components cool
- Removable locking lid with three key options
- Holds laptops, digital signage players, switchers and other
  electronics of similar size with 13.25 x 11.25 x 3 in. of
  storage space
- Openings in shelf may be used to attach the included
  equipment straps
- Ultra-flat shelf incorporates cable management

See www.mounts.com for full list of features.

PREMIER MOUNTS®
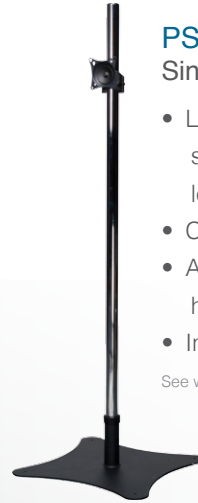

For Digital Signage
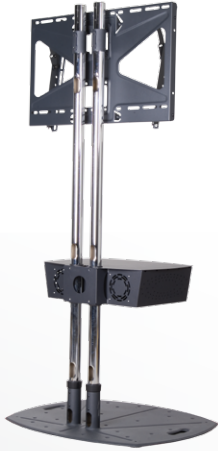

TL STAND
with PSD-GBSHLF & CTM Mount

- Allows air flow to keep A/V equipment and IT components cool
- Adapts to dual pole carts and stands
- Lockable hinged lid
- Integrated rack rails, 3RUs high
- Works with CTM, RTM-S, RTM-L, UFA or USA mounts (not included)

See www.mounts.com for full list of features.

PSP
Single-Pole, Low-Profile Floor Stand

- Low-profile base (0.25 in.) can easily slide under carpet for a seamless look
- Cable management inside poles
- Available in 60 in., 72 in. and 84 in. heights
- Includes one single display adapter

See www.mounts.com for full list of features.

TL72-MS2
Lightweight Floor Stand with 72 in. Dual Poles and Tilting Mount for Flat-Panels up to 175 lb.

- Patented Griplate™ (US Patent number 8,035,757 B2) support the flat-panel and hold the display tight on its mounting brackets
- 12° of tilt provided by patented Clevis tilt mechanism
- Lightweight, reinforced design
- Base features ergonomic transport handles
- Cable management inside poles
- Adjustable flat-panel placement along poles for perfect viewing height

PSD-CS
Back-to-Back Floor Stand

- Mount two (or more) flat-panels back-to-back
- Adjustable flat-panel placement along poles
- Cable management inside poles
- Available in 60 in., 72 in. and 84 in. heights
- Requires CTM Series mount (not included)
- Includes one dual display adapter

See www.mounts.com for full list of features.
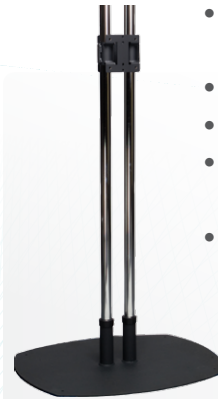

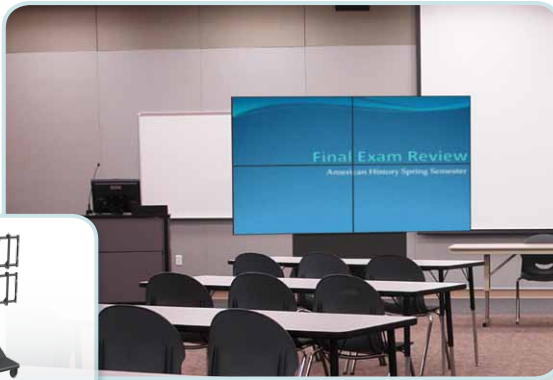

Mobile Carts

FEATURES

- Pick a pre-configured cart or stand for common uses
- Mix and match individual parts for special projects
- Lightweight or heavy duty base
- Route cables through the pole(s)
- Mount adapter included to attach display mount to poles
- Chrome or black powder-coated poles
- Many post-installation accessories available

User-friendly and versatile, Premier Mounts' mobile carts can be individually mixed and matched to meet any specific project requirements. Flexibility and adaptability are also built into the products as they are mobile and can be placed in any location, such as the ability to fly the video wall stands from the ceiling. Whether mounting one flat-panel to a floor stand or creating a mobile video wall, Premier Mounts has an option to fit any need.

PREMIER MOUNTS®

For Digital Signage

Educational

Mobile carts provide a versatile option for many settings, including education. Set up a mobile video wall cart for a seamless display during presentations and have the freedom to move about the classroom with heavy-duty casters for swift mobility and easy maneuvering. User-friendly features include hassle free setup, with the cart assembled and ready in 30 minutes or less.

Events

Large-scale digital signage is now available anywhere. Reinforced design make mobile carts ready and able to support any extra large, high definition display for an overall seamless, mobile digital signage presentation. Capable of supporting up to 500 lb., the displays can be moved about easily with heavy-duty casters specifically designed to support the weight of even the heaviest displays.

Hospitality

Providing flexibility and versatility, mobile carts and stands allow digital signage to be placed anywhere for an optimal view. Designed to easily fit displays, video wall configurations, or other accessories, carts and stands can be customized to fit any digital signage need. Provide an organized, seamless look without any hassle or frustration.

Mobile Carts

MVWC-2X2
2X2 Mobile Video Wall Cart

- Accommodates displays from 45" up to 60"
- Stable base ensures solid support and equipment protection
- Easy mobility, especially important in congested areas such as trade shows or other events

PSD-BW
Mobile Nesting Cart

- Nesting base design is ideal for tight storage spaces
- Designed to easily roll through standard doorways
- Includes 2 locking and 2 non-locking heavy-duty casters
- Available in 60 in. and 72 in. heights
- Works with CTM, RTM-S, RTM-L, UFA or USA Mounts (not included)
- Complete stand includes one single-display adapter

See www.mounts.com for full list of features.

PREMIER MOUNTS®

For Digital Signage

PMC-MM-085
Mobile Mega Mount Cart

- Positive and negative tilt adjustment
- 360° rotation for viewing options in portrait or landscape orientation
- Heavy-duty casters allow for swift and precise maneuvering
- Solid bottom skirt and tray to store and protect A/V or IT equipment
- Supports 85" displays with optional mounting brackets for 103" displays

See www.mounts.com for full list of features.

PSD-EBC
Elliptical Floor Cart

- Adjustable flat-panel placement along poles
- Includes 2 locking and 2 non-locking heavy-duty casters
- Cable management inside poles
- Available in 60 in. and 72 in. heights
- Works with CTM, RTM-S, RTM-L, UFA or USA Mounts (not included)
- Complete cart includes one dual-display adapter (PSD-SPA)

See www.mounts.com for full list of features.

iPad™ Mounts

IPM-110

IPM-700

FEATURES

- Easily and securely mounts the iPad™ for innovative, state-of-the-art digital signage installations

- 360° rotation on most mounts make it easy to switch between landscape and portrait orientation

- Open mounting frames give access to some or all iPad™ controls and connections

- Some of the mounting frames attach to VESA 100 x 100mm mounting plates or arms

- Lock-It™ security screws included with most iPad™ mounts

PREMIER MOUNTS®

Compact Digital Signage

The Apple® iPad™ is leading the wave of touchscreen tablets being integrated in state-of-the-art digital signage installations. They're perfect for use as digital signage in hotel rooms and restaurants. Premier Mounts has developed a wide selection of commercial grade iPad™ mounts to meet the needs of digital signage applications, offering versatility, flexibility and security.

Choose from a variety of stylish models, including limited access or touchscreen-only mounting frames, full-access mounts, tabletop stands, wall mounts, or adapters for carts or stands. Some of the iPad™ mounts limit access to controls to prevent guests, employees or students from connecting to the iPad™ using the dock connector port. This feature is great for secure use in hotel rooms, trade shows, schools, museums and restaurants.

Premier Mounts' iPad™ mounts include adjustable mounts that can freely stand or be attached to a table or wall. Mounting frames designed to install easily and securely hold the iPad™ include the IPM-110 and IPM-700 mounting frames. They cover all of the iPad™ controls and connections, permitting the user to only interact with the app on the screen. The IPM-700 allows installation over an in-wall box to accommodate the power supply and other cables of the iPad™.

iPad™ Mounts

IPM-100
Protected VESA Mounting Frame for iPad™

• Conceal all controls and power cables except home button

IPM-110
Protected VESA Mounting Frame for iPad™

• Conceal all controls and power cables

See www.mounts.com for full list of features.

IPM-200
VESA Mounting Frame for iPad™

• The mounting frame can be attached to any table or wall mount with a VESA 100 x 100mm mounting pattern for ease of use
• Open mounting frame gives access to all iPad™ controls and connections

See www.mounts.com for full list of features.

PREMIER MOUNTS®

Compact Digital Signage

IPM-500
iPad™ Wall Mount System

- Simply mount the mounting disk to any flat surface in portrait or landscape orientation
- 360° rotation
- Locking screw to prevent iPad™ removal from wall

See www.mounts.com for full list of features.

IPM-700
Protected Fully Enclosed Mounting Frame for iPad™

- Covers all operation buttons for complete security
- Available in chrome, stainless steel, white and black
- Wireless network compatible
- Optional In-Wall A/V and Power GearBox™ (GB-INWAVPB) provides room for power adaptor
- Other versions available with access to home button and/or camera

See www.mounts.com for full list of features.

Ceiling Mounts

FEATURES

- Supports 37"-63" displays
- Ultra-thin design
- Integrated cable management
- Suspends from ceiling with 1.5 in. or 2 in. NPT (not included)
- Optional brackets for mini PCs and media player adapters
- Universal mounting brackets

Lightweight, easy to use, and ready for displays right out of the box, the ECM series ceiling mount provides single, double, triple, and quadruple display mounting setups. Built-in cable management provides a sharp and organized appearance, or attach one of Premier Mounts' GearBoxes™ for additional equipment storage. A versatile mount with superior options for corporate or retail digital signage.

PREMIER MOUNTS®

For Digital Signage

Ceiling Suspended Video Wall

Many digital signage installations require mounts to be suspended from the ceiling. The ECM Series of ceiling mounts comes in a wide range of different configurations to fit many applications. Mounting a set of ECM mounts next to each other provides an almost seamless setup for a linear video wall.

Single Ceiling Mounts

ECM ceiling suspended mounts provide a variety settings with digital signage support. From airports to restaurants to school recreation centers, as seen at the UCI Student Recreation Center.

Back to Back Ceiling Mounts

While most ceiling suspended digital signage installations use off-the-shelf ECM mounts, modifications or customizations may be needed to fit project requirements. Premier Mounts has a long tradition of designing and manufacturing custom mounts for many applications, including digital signage. Count on Premier Mounts' designers and engineers to ensure a successful digital signage installation.

ECM Ceiling Mounts

ECM-3763S
Ceiling Mount for Flat-Panels up to 175 lb.

- Supports flat-panels from 37"-63"
- Mount displays right out of the box with no adapters needed
- Works with optional brackets for mini PCs and digital media player adapters
- Ultra-thin design keeps center of gravity close to flat-panel to reduce deflection

See www.mounts.com for full list of features.

ECM-D70T
Ceiling Mount for Dual Flat-Panels up to 46"

- 15° of tilt
- Holds two flat-panel displays up to 46" each in portrait or landscape orientation
- 360° swivel with 2 in. coupler

See www.mounts.com for full list of features.

ECM-3763D
Back-to-Back Ceiling Mount for Flat-Panels up to 63"

- Supports two flat-panels back-to-back
- Mount displays right out of the box - no adapters needed
- Works with optional brackets for mini PCs and digital media player adapters
- Integrated cable management keeps installation clean and organized

See www.mounts.com for full list of features.

PREMIER MOUNTS®

For Digital Signage

ECM-3763T
Triple Ceiling Mount for Flat-Panels up to 63"

- Supports three flat-panels in a fixed ring
- Mount displays right out of the box - no adapters needed
- Works with optional brackets for mini PCs and digital media player adapters
- Integrated cable management keeps installation clean and organized
- May be suspended from 2 in. NPT pipe

EMC-3763Q
Quadruple Ceiling Mount for Flat-Panels up to 52"

- Supports four flat-panels in a fixed ring
- Mount displays right out of the box - no adapters needed
- Works with optional brackets for mini PCs and digital media player adapters
- Integrated cable management keeps installation clean and organized
- Can be suspended from 2 in. NPT pipe

Equipment Storage Boxes

GB-MBX130
Storage space of 8"x8"x2.63"
- Fits Mac minis™, mini PCs and other small media components

See www.mounts.com for full list of features.

GB-MBX230
Storage space of 13.25"x11.25"x3"
- For laptops, digital signage players, switchers and other electronics

See www.mounts.com for full list of features.

GB-MBX330
Storage space of 17.88"x13.71"x5.35"
- Integrated rack rails holds equipment up to 3RU, small PCs and other AV equipment

See www.mounts.com for full list of features.

P-Series Flat and Tilt Wall Mounts

P4263T mounts as a
linear video wall

P4263TP

P-SERIES FEATURES

- Low-profile design holds display less than 2 in. from the wall
- Mounting slots allow for a variety of stud configurations
- Lateral shift
- Post-installation leveling
- Up to 10° continuous downward tilt
- Lock-It™ security barrel included

Secure, adjustable, and economically feasible, the low-profile fixed and tilting portrait flat-panel mounts are the perfect answer for any digital signage need. Great for restaurants with a digital menu or in any digital signage environment. Features such as built-in lateral shift and an open design allow for adjustments to be made after installation as well as quick and easy access to cable routing or power receptacles.

Versatile Wall Mounts for Digital Signage

Portrait Mounts for Digital Signage

The portrait mount is designed especially for digital signage projects where flat-panels are more commonly installed in portrait orientation. The new portrait mount shares the same great features as the rest of the P-Series product line, including post-installation leveling, lateral shift and security locking barrels. The large opening in the base plate allows easy access to power cords.

The P-Series mount is a versatile option for digital signage, providing a sleek appearance with its low-profile design. Showcasing a P-Series installation for the PBR Rock Bar in Las Vegas, Nevada, the low-profile design is a perfect match for the exposed, outside area of installation.

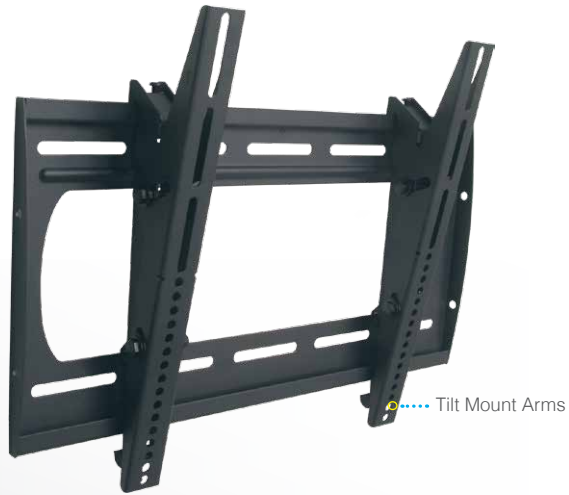

Menu Boards and Public Information Display

Combine P-Series mounts into a linear video wall or menu board by connecting them side-by-side. Add A/V shelves to hold accessories like media players, keyboards and video cameras for digital signage and information kiosks.

P-Series Flat-Panel Mounts

P-SERIES MOUNTS
Low-Profile Mount for Flat-Panels

- Low-profile design
- Post-installation leveling adjustments
- Open design for easy cable and electrical access
- Built-in lateral shift
- Universal hardware pack includes innovative universal spacers and M4-M8 screws
- Lock-It™ security barrel included
- Fits flat-panel displays from 26" to 80"
- Available with fixed(F) or tilting(T) mounting brackets

See www.mounts.com for full list of features.

Tilt Mount Arms

P2642T
- For flat-panels 26" to 42"

See www.mounts.com for full list of features.

P4263T
- For flat-panels 42" to 63"

See www.mounts.com for full list of features.

P5080T
- For flat-panels 50" to 80"

See www.mounts.com for full list of features

PREMIER MOUNTS®

Portrait Mounts for Digital Signage

P-SERIES PORTRAIT MOUNTS
Low-Profile Mount for Flat-Panels

- Supports flat-panel displays ranging from 42" to 63" and weighing up to 130 lb. (59 kg)
- Holds the display less than two inches from the wall
- Feature post-installation leveling, lateral shift and a security locking barrel for ease of installation

See www.mounts.com for full list of features.

····· Tilt Mount Arms

P4263TP

- Provides 8° of downward tilt

See www.mounts.com for full list of features.

P4263FP

- Low-profile design holds the display less than an inch from the wall

See www.mounts.com for full list of features.

Projector Mounts for Digital Signage
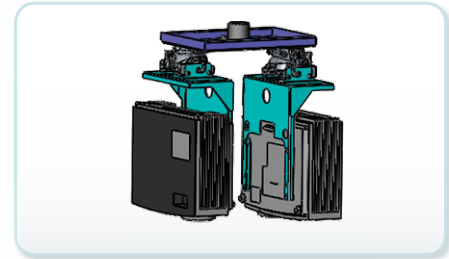

Custom mounting brackets with
FTP projector mounts

FTP projector mount for digital signage

Projector mounts are commonly used for projecting images onto a wall or ceiling-mounted projection screen. EyeClick, a digital signage software provider, used Premier Mounts' FTP projector mounts to create an interactive floor projection application for a fast food restaurant to entertain children.

Premier Mounts' custom design engineers created a custom ceiling mount bracket that utilized two FTP projector mounts to hold and point two BenQ SP870 projectors towards the floor. The FTP projector mount was chosen for its fine-tune, post-installation adjustments, which include independent pitch, roll, and yaw controls. The custom projector mounts, combined with EyeClick's software and sensors and BenQ's projectors, helped create an amazing interactive playground for children at the restaurant.
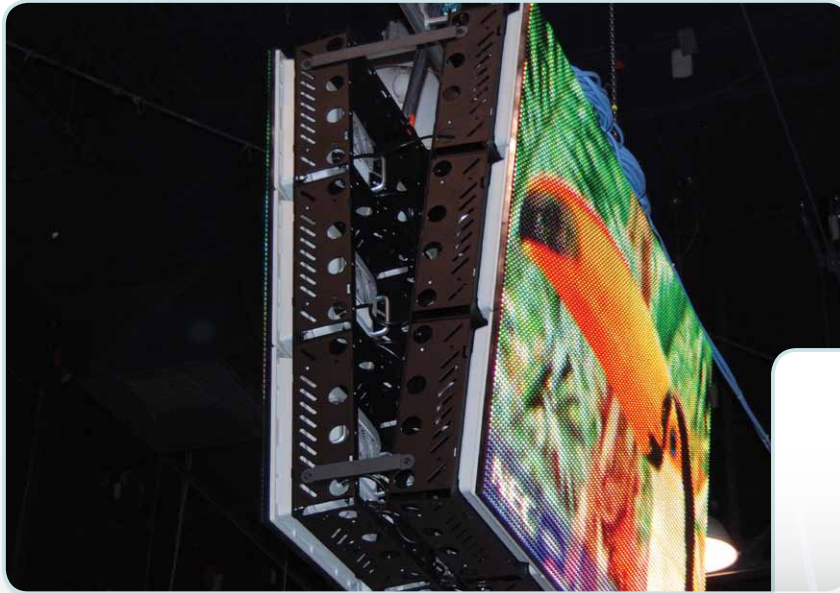

PREMIER MOUNTS®

Custom Mounts for Digital Signage

Kiosk for digital signage

Custom kiosk displays may be freestanding displays or mounted in or on a wall. They can be designed to fit most flat-panel displays and are available in a variety of colors. These kiosks support the flat-panel in either portrait or landscape orientation. Other options include acrylic fronts to protect the flat-panel and additional fans. Please contact customer service for more information.

Mobile or Flying High

LED Module Display Frames

Premier Mounts designs custom mounting frames for LED Module Video Displays typically used in large venues and outdoor signage. The mounts are designed to easily connect to each other in order to build a solid "backbone" for large LED video walls.

Even though many LED modules for large video wall displays are designed to connect to each other, Premier Mounts' mounting frames provide a much sturdier mounting structure for large video walls.

Premier Mounts' mounting frames are typically custom designed for each product. Common features include open space for cable routing, easy pre-installation to the primary mounting surface, which prevents damage to the LED module during construction, and easy attachment of LED modules to the mounting frame.

PREMIER MOUNTS®

# Custom Video Wall Installations

LMV Video Wall Framing System

Custom design, manufacturing, and installation of a 10x10, 100-screen video wall, the largest panoramic video wall in a U.S. airport, completed at McCarran International Airport in Las Vegas, Nevada using Premier Mounts' LMV large matrix video wall mounts.

McCarran International Airport, along with Samsung and Alliance Airport Advertising, enlisted the help of Premier Mounts with a custom install of the largest panoramic video wall in a U.S. airport. The 100-screen video wall, measuring 33 feet by 19 feet, was installed at McCarran's D Concourse rotunda. Using custom design and manufacturing, Premier Mounts fabricated a custom, model-specific version of the LMV to accommodate the video wall matrix at McCarran. Expertise and superior customer service were also factors that contributed to the decision to include Premier Mounts in this collaboration between Samsung, Alliance, and McCarran to successfully complete the undertaking of this ambitious project.

The LMV has a unique spring activated automatic scissor extension feature that makes it easy to install and remove displays, regardless of their position on a video wall. Three point fine-tune adjustments ensure seamless display alignment and leveling and a 9 in. pull out feature allows for full display serviceability.
